# KOMPETENSBI

Engagerade, innovativa och nytänkande föreläsare som delar med sig av sin kunskap.

Vi fortsätter succén med vår kompetensbio som denna gång går av stapeln i Stockholm 27 april 2017. Du och dina kollegor är inbjudna till en spännande och lärorik kväll!

## Scandinavian innovation will fast track IoT. I'm serious.

IoT is on the rise, and Scandinavia is leading the charge in this innovative area with companies such as AirThings, Disruptive Technologies, and many more, the future is indeed here!

In this talk we'll look at Nordic examples to showcase IoT's development past, present and future.

Security and Simplicity are key concepts for IoT and you will learn best practices for designing your solutions.

Architecture becomes more important than ever with IoT solutions, and you will walk away with in-depth knowledge about how your software skills combined with Scandinavian innovations will make for simple and powerful implementations.

Joakim Lindh

## About the Speaker

Joakim is IoT Tech Lead at Webstep. He previously worked at Texas Instruments where he supported companies worldwide with product definition, software development and field deployment of wireless connectivity solutions. Working close to customers has given Joakim a great understanding of system development and the challenges introduced when implementing with a new technology.
