

# KOMPETENS BIO

*Efficient team + Tackling legacy code + Agent 007*

## How to build and be a part of a highly efficient team

Why are some teams more efficient than others? What are the components of building a great team? How can you contribute to this greatness? In this talk I will give insight to these questions. I will also focus on how every team member can contribute to making the team highly efficient by using and enhancing your relational skills. I will use examples from the consultancy Webstep and from our projects.

Kjell Ljöstad shares his experiences. (in English)

## Tackling legacy code

Legacy code is something every programmer ends up working with during ones career. Most find it difficult if not outright scary. Yet, with knowledge, it can be quite rewarding and fun. During this session I will present a collection of techniques that I tend to use when working with legacy systems.

Tomas Malmsten shares his experiences. (in English)

## Agenda

- 17:00 Food and Mingle
